SECURE PASSWORDS

DO

- * Think of a phrase that means something to you and use the first letter of each word to form a password. Add numbers to make it even more secure
- * Make sure that nobody watches you entering your password
- * Change your password if somebody else might know it

DON'T

- * Don't just use one password for all systems that you use
- * Don't include any personal details that others may know
- * Avoid using dictionary words as these are easy to guess
- * Don't tell anybody your password or write it down
